What You Will Learn...

Main Ideas

1. Canada has a democratic government with a prime minister and a parliament.
2. Canada has four distinct geographic and cultural regions.
3. Canada's economy is largely based on trade with the United States.

The Big Idea

Canada's democratic government oversees the country's regions and economy.

TAKING NOTES

Use the graphic organizer online to take notes on present-day Canada.

Canada Today

If YOU lived there...

You and your family live in Toronto, Ontario. Your parents, who are architects, have been offered an important project in Montreal. If they accept it, you would live there for two years. Montreal is a major city in French-speaking Quebec. You would have to learn a new language. In Montreal, most street signs and advertisements are written in French.

How do you feel about moving to a city with a different language and culture?

BUILDING BACKGROUND Canada today has been shaped by both history and geography. Canada's first European settlers were French, but the British eventually controlled the territory. Differences in culture still remain, however. In addition, the four regions of Canada are separated by vast distances, economic activities, and culture.

Canada's Government

"Peace, order, and good government" is a statement from Canada's constitution that Canadians greatly value. Canadians are proud of their democratic government, which is led by a prime minister. Similar to a president, a prime minister is the head of a country's government.

Canada's prime minister oversees the country's parliament, Canada's governing body. Parliament consists of the House of Commons and the Senate. Canadians elect members of the House of Commons. However, senators are appointed by the prime minister.

Canada's 10 provincial governments are each led by a premier. These provincial governments are much like our state governments. Canada's central government is similar to our federal government. The Canadian federal system lets people keep their feelings of loyalty to their own province.

READING CHECK

Comparing How is Canada's government similar to that of the United States?

Canada's Regions

Canada's physical geography separates the country into different regions. For example, people living on the Pacific coast in British Columbia are isolated from Canadians living in the eastern provinces on the Atlantic coast. Just as geographic distance separates much of Canada, differences in culture also define regions.

Regionalism

The cultural differences between English-speaking and French-speaking Canadians have led to problems. English is the main language in most of Canada. In Quebec, however, French is the main language. When Canadians from different regions discuss important issues, they are often influenced by regionalism. **Regionalism** refers to the strong connection that people feel toward the region in which they live.

In some places, this connection is stronger than people's connection to their country as a whole. To better understand regionalism in Canada, we will now explore each region of the country. As you read, refer to the map below to locate each region.

The Eastern Provinces

The region called the Eastern Provinces is a region that lies on the Atlantic coast of Canada. The provinces of New Brunswick, Nova Scotia, and Prince Edward Island are often called the Maritime Provinces. **Maritime** means on or near the sea. The province of Newfoundland and Labrador is usually not considered one of the Maritime Provinces. It includes the island of Newfoundland and a large region of the mainland called Labrador.

A short growing season limits farming in the Eastern Provinces. However, farmers in Prince Edward Island grow potatoes.

Close-up

Quebec's Winter Carnival

At the annual Winter Carnival in the city of Quebec, millions of Canadians and visitors from around the world brave below-freezing temperatures to celebrate French Canadian culture.

The Inuit people traditionally used dogsleds as a means of transportation. Today dogsledding is a popular sport in Canada and a highlight of the carnival.

Most of the economy in Canada's Eastern Provinces is related to the forestry and fishing industries.

Many people in the Eastern Provinces are descendants of immigrants from the British Isles. In addition, French-speaking families have moved from Quebec to New Brunswick. Most of the region's people live in coastal cities. Many cities have industrial plants and serve as fishing and shipping ports. Along the Atlantic coast lies Halifax, Nova Scotia, the region's largest city.

The Heartland

Inland from the Eastern Provinces are Quebec and Ontario, which together are sometimes referred to as the Heartland. More than half of all Canadians live in these two provinces. In fact, the chain of cities that extends from Windsor, Ontario, to the city of Quebec is the country's most urbanized region.

The provincial capital of Quebec is also called Quebec. The city's older section has narrow streets, stone walls, and French-style architecture. **Montreal** is Canada's second-largest city and one of the largest French-speaking cities in the world. About 3.8 million people live in the Montreal metropolitan area. It is the financial and industrial center of the province. Winters in Montreal are very cold. To deal with this harsh environment, Montreal's people use underground passages and overhead tunnels to move between buildings in the city's downtown.

In Canada many residents of Quebec, called Quebecois (kay-buh-KWAH), believe their province should be given a special status. Quebecois argue that this status would recognize the cultural differences between their province and the rest of Canada. Some even want Quebec to become an independent country.

FOCUS ON READING

In the paragraphs under The Heartland sort the facts into different lists.

Many of the city's buildings reflect French architecture.

ANALYSIS SKILL ANALYZING VISUALS
From the clues you see in this scene, what do you think is unique about French Canadian culture?

Ice sculptures created by Canadian and international artists line the carnival's grounds.

The carnival's mascot is a snowman who wears a traditional Canadian sash and hat.

On the other hand, many English-speaking Canadians think Quebec already has too many privileges. Most Canadians, however, still support a united Canada. Strong feelings of regionalism will continue to be an important issue.

With an even larger population than Quebec, the province of Ontario is Canada's leading manufacturing province. Hamilton, Ontario, is the center of Canada's steel industry. Canada exports much of its steel to the United States.

Ontario's capital, Toronto, is a major center for industry, finance, education, and culture. Toronto's residents come from many different parts of the world, including China, Europe, and India.

Canada's national capital, **Ottawa**, is also in Ontario. In Ottawa many people speak both English and French. The city is known for its grand government buildings, parks, and several universities.

The Western Provinces

West of Ontario are the prairie provinces of Manitoba, Saskatchewan, and Alberta. On the Pacific coast is the province of British Columbia. Together, these four provinces make up Canada's Western Provinces.

More people live in Quebec than in all of the prairie provinces combined. The southern grasslands of these provinces are part of a rich wheat belt. Farms here produce far more wheat than Canadians need. The extra wheat is exported. Oil and natural gas production is a very important economic activity in Alberta. The beauty of the Canadian Rockies attracts many visitors to national parks in western Alberta and eastern British Columbia.

British Columbia is Canada's westernmost province and home to almost 4 million people. This mountainous province has rich natural resources, including forests, salmon, and valuable minerals.

Daily Life in Nunavut

Even in June, snow covers the small town of Pond Inlet, Nunavut. The Inuit here travel by snowmobile and enjoy ice fishing.

Nearly half of British Columbia's population lives in and around the coastal city of **Vancouver**. The city's location on the Pacific coast helps it to trade with countries in Asia.

The Canadian North

Northern Canada is extremely cold because of its location close to the Arctic Circle. The region called the Canadian North includes the Yukon Territory, the Northwest Territories, and Nunavut (NOO-nuh-voot). These three territories cover more than a third of Canada but are home to only about 100,000 people.

Nunavut is a new territory created for the native Inuit people who live there. Nunavut means "Our Land" in the Inuit language. Even though Nunavut is part of Canada, the people there have their own **distinct** culture and government. About 30,000 people live in Nunavut.

The physical geography of the Canadian North includes forests and tundra. The frozen waters of the Arctic Ocean separate

isolated towns and villages. During some parts of the winter, sunlight is limited to only a few hours.

READING CHECK **Drawing Conclusions** How does geography affect the location of economic activities in the Western Provinces?

Canada's Economy

As you learned in Section 1, Canada has many valuable natural resources. Canada's economy is based on the industries associated with these resources. In addition, Canada's economy also benefits from trade.

Industries

Canada is one of the world's leading mineral producers. Canadians mine valuable titanium, zinc, iron ore, gold, and coal. Canada's iron and steel industry uses iron ore to manufacture products like planes, automobiles and household appliances. However, most Canadians work in the services industry. For example, tourism is

ACADEMIC VOCABULARY
distinct separate

Canada's fastest-growing services industry. Canada's economy also benefits from the millions of dollars visitors spend in the country each year.

Trade

Canada's economy depends on trade. Many of Canada's natural resources that you have learned about are exported to countries around the world. Canada's leading trading partner is the United States.

As the world's largest trading relationship, Canada and the United States rely heavily on each other. About 50 percent of Canada's imported goods are from the United States. About 75 percent of Canada's exports, such as lumber, goes to the United States.

However, the United States placed tariffs, or added fees, on Canadian timber. American lumber companies accused Canada of selling their lumber at unfairly low prices. Canada argued that the tariffs were unfair according to the North American Free Trade Agreement (NAFTA).

The export of cattle to the United States has also been an area of dispute between the two countries. When a Canadian cow was discovered with mad cow disease in 2003, the U.S. banned the import of all cattle from Canada. Canadian ranchers now claim that all their cows are free of the disease. As of 2012, about 70 percent of Canadian cattle and meat products are exported to the U.S.

READING CHECK Summarizing What goods does Canada export?

SUMMARY In this section you learned that Canada has distinct regions that are separated by both geography and culture. The U.S. and Canada share a common history, a border, and the English language. Next you will learn about the country of Mexico.

Trade with the United States

Major Exports

- Petroleum Products
- Automobiles and parts
- Lumber

Major Imports

- Automobiles and parts
- Chemicals
- Plastics

Section 3 Assessment

ONLINE QUIZ

Reviewing Ideas, Terms, and Places

1. **a. Recall** What office heads Canada's government?
b. Summarize How is Canada's parliament structured?
2. **a. Define** What is **regionalism**?
b. Contrast How are Canada's Western Provinces different from the Canadian North?
c. Evaluate Why do you think the Quebecois want to break away from Canada?
3. **a. Describe** How are Canada's natural resources important to the country's economy?
b. Draw Conclusions Why do Canada and the United States rely on each other as trading partners?

Critical Thinking

4. **Comparing and Contrasting** Use your notes to complete this chart. List the similarities and differences between the Eastern Provinces and Western Provinces.

Similarities	Differences
1.	1.
2.
